

BlackBOX Sistemi AUTOMOTIVE

BMW HU SERVICE HISTORY MANAGER

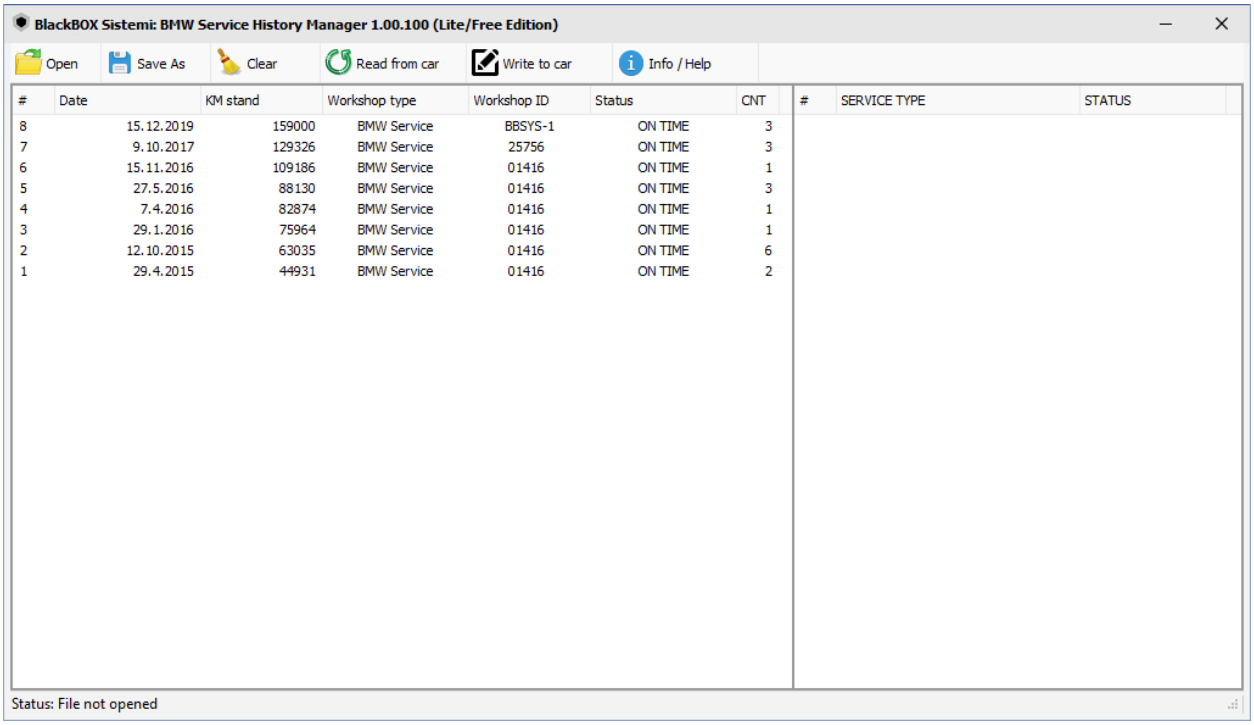

Main program interface

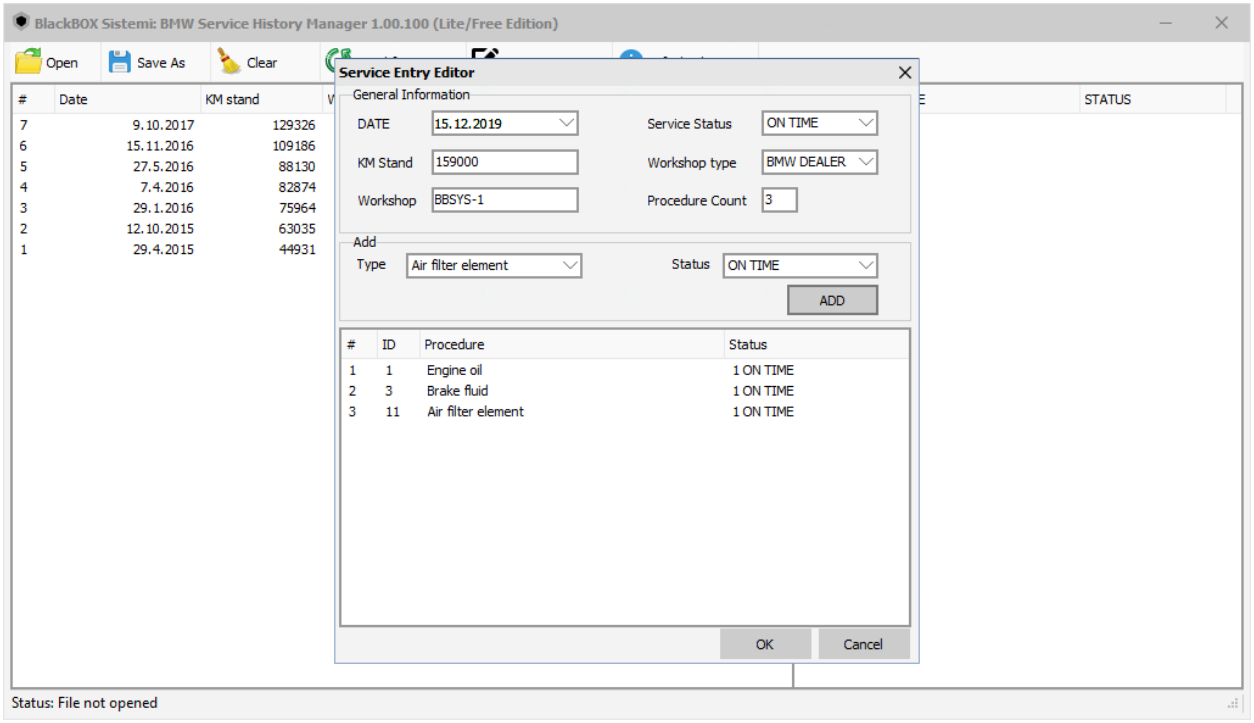

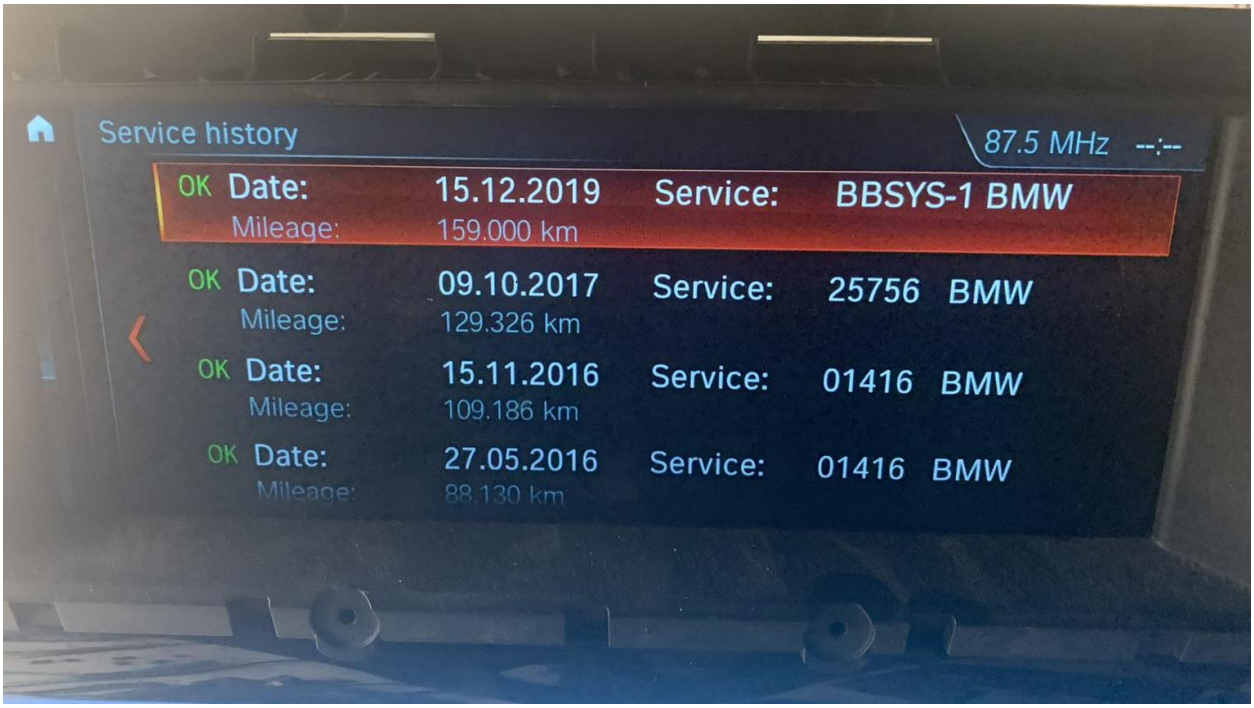

- **Creating/Edit/Delete new service history list:**
  In main program interface, you can right click on left panel to add edit or delete service

- **Read from car:**
  <u>THIS OPTION IS AVAILABLE ONLY IN PRO VERSION</u>
  Connects to the car via ENET cable connection, reads out current service history list and saves it to local file. This file you can then edit and write back to the car.

- **Write to car**
  Connects to the car via ENET cable connection, **<u>erases current service history (THIS OPTION CAN BE DISABLED IN PRO)</u>**, and writes data from SHM. Data will be written / shown (in car) in order displayed in SHM.
